CRAFTSMANSHIP

Tradition fused with advanced technology:
passion in everything we make

Cover Photograph:
INTERSECT BY LEXUS-TOKYO in Minami-Aoyama, Tokyo

The reflected "moonlight path" created by the faint glow of the moon on gently rippling water...now captured in a textile pattern.

This is the Nishijin Textile® LEXUS collection that adds color to lifestyles, with each item carefully artisan-crafted one by one using materials of discernment.

The "moonlight path," that mysterious natural phenomenon visible for only a few days before and after the full moon, where the reflected glow of the moon creates the appearance of a narrow passage on the surface of the sea, and the subtle gradations of the light bathing the shimmering waves enchant the eye. The door trim on the new LS uses Nishijin Textile® that takes the lovely sight of this "moonlight path" as its motif, replicating it with glimmering silver threads. And now the LEXUS collection has also added a selection of exquisite items made using the same fabric to add a touch of splendor to your lifestyle. Nishijin Textile® has flourished in Kyoto since some 1,200 years ago, enjoying the patronage

of the nobility and warrior class as well as wealthy townspeople. Production requires more than twenty highly specialized steps, with each overseen by an expert artisan, all dedicated to the pursuit of beauty. These original LEXUS items are the result of collaboration with HOSOO, which continues to take up the challenge of innovative product-making that imbues this traditional Nishijin Textile® with novel sensibilities.

*Nishijin Textile® is a registered trademark of the Nishijin Textile Industrial Association.

HOSOO

Founded in 1688 in Nishijin, Kyoto, as a weaving establishment catering to large temples. Even while carrying down traditional Nishijin Textile® skills for obi sashes and kimonos on into modern times, by adding innovative techniques and timeless design sensibilities to create unique textiles, HOSOO is advancing into the luxury market both in Japan and overseas together with also turning its expertise to the door-trim materials for the new LS.

Made in Japan

These products ship 1.5 to 2 months after order receipt.

*Products #1 to #3 are handmade one by one. Therefore, the color, pattern, and texture of delivered products will differ from the photograph.

An original LEXUS model made in collaboration with world-renowned piano maker Kawai

This Structural Blue ukulele is a one-of-a-kind shade of blue derived from principles of light like those seen with morpho butterflies and seawater.

This is a standard-size (soprano) ukulele featuring the same "Structural Blue" finish as the LC500 Convertible special edition*. Developed through application of a principle dubbed structural coloration*1, this uses a special paint that appears blue due to reflection and interference of light. Seasoned luthiers paint and tune each one by hand.

*1 Structural coloration
When a substance appears to be a certain color when exposed to light - even if the substance itself has no color.

*A special-specification model made available as a limited edition in June 2020. It proved tremendously popular and has sold out.

4 Structural Blue

A mini grand piano whose uncompromising design extends even to keyboard touch.

The colors of the mini grand piano body and partitions are original specifications based on the body colors and interior colors of LEXUS. Furthermore, the piano body is specially painted with a two-layer coat by a piano painter, and each piano is carefully finished. The sound source is characterized by the clear and pleasing sound of Kawai's unique oval aluminum pipe. Craftsmen carefully tune the sound of each of the 32 keys by hand. Since this piano will be the start of a child's musical journey, we insist on precise pitch accuracy so that the child can learn and enjoy the correct pitch. Moreover, through a keyboard which is highly responsive to the touch, this authentic acoustic mini grand piano expresses the dynamism of piano performances. This piano will bring joy to children and also functions as a stylish interior decoration.

5. Mini Grand Piano

Red, White, Black 201C001 **36,300 yen** (tax incl.)

6. Folding Fan

211C008 **14,300 yen** (tax incl.)

These folding fans feature a design whose motif is the pattern of the door trim on the new LS. The two outer ribs use aluminum material, each one is crafted one by one with meticulous care by Maisendo artisans in Kyoto. Included is a case made of material with a bacteriostatic finish.

Material: [Fan] Fan face: Polyester and cotton, bamboo, aluminum, and brass
[Case] Polyvinyl chloride
Size: [Rib] 228 mm [Case] 245 mm (W) × 50 mm (H) Made in Japan

* The fan's pattern differs depending on the cut section of the fabric.

Bacteriostatic finish: This is a finish that inhibits bacterial growth on the cloth material.
*No guarantee of effectiveness against all types of bacteria is made.

Maisendo

A Kyoto establishment dealing exclusively in folding fans, Maisendo is a sourcepoint for fans of new sensibilities. Even while carrying on the traditional handcrafting methods of Kyoto folding fans, the company continues to create fans that enhance contemporary lifestyles and fashion.

7. Ballpoint Pen (Leather) /Oil-based

181C039 **12,223 yen** (tax incl.)

A twist-action ballpoint pen made from leather used in LC steering wheels. Each stitch is carefully sewn by using the overlock sewing method which used for LC steering wheels. The LEXUS mark and logo are embossed on the side.

Material: Cowhide, Brass
Size: 135 mm (L) × 12 mm (D) (Shaft DIM)
Weight: Approx. 38 g

Made in Japan

SHIMA

8 YABANE

HAMON

KISSHO patterns

YABANE pattern

The YABANE pattern depicts arrow feathers which rotate while cutting through the wind and guiding the arrow to its target. This lucky pattern is said to bring good luck on the battle field and a successful career.

HAMON pattern

A tradition Japanese pattern, HAMON is a lucky pattern which represents the continuation of a peaceful life.

SHIMA pattern

The SHIMA pattern is formed by alternating thick lines and thin lines. This pattern is also called Koukou, which means "filial piety." It is said to bring a safe and prosperous household.

*1 KISSHO patterns: Auspicious motifs

Size: 175 mm (W) × 175 mm (H) × 40 mm (D) Weight: Approx. 400 g
Accessories: One AA battery, Auxiliary leg (for display as a table clock)
Made in Japan

This product ships 1 month after order receipt.

*The clock uses an SKP movement mechanism that is sold by Seiko Clock, Inc.

New annual growth rings appear every year. The grain, color, and texture of wood vary depending on the age and environment in which the tree grew. Focusing on the beauty of these annual growth rings, our clocks are carefully crafted by skilled craftsmen from a single piece of natural wood. Unique techniques are used to form mosaic woodwork and create KISSHO patterns*1 which express joyous wishes and desires. The clock can be hung on the wall or displayed as a table clock. A description of the pattern and a serial number are engraved on the back of the clock. You can also have an original message engraved on the back.

*Due to the use of natural materials, the colors, patterns, and textures shown here will differ from the delivered products.

MIMATSU Craft Ltd.

Founded in 1972. Manufactures furniture parts for the leading furniture production areas, Okawa and Morodomi. By utilizing the woodworking techniques of craftsman in Saga Prefecture, MIMATSU Craft creates products with outstanding design and functionality. For example, the company launched the original brand M.SCOOP in 2008. MIMATSU Craft won the 2018 Wood Design Award and the 2018 Fukuoka Design Award.

A treasure chest of sound made of sparkling crystal

Fusing advanced technology and craftsmanship. Our music box gives live performances of 1,172 songs in the healing tone of 528 Hz.

Primotone Crystal is an electronic music box that plays live performances by using fine pins to pluck comb teeth in accordance with specially created musical composition data. The music box was born from the advanced motor technology and electronic control technology of Brother Industries, and from the extensive know-how in musical composition of XING Inc. It was born from Brother Industries' advanced motor technology and electronic control technology, as well as a wealth of know-how in creating music. Musical composition data for 1,172 songs are recorded on three special SD cards. Powered by an AC adaptor, the music box can perform a symphony lasting more than 30 minutes. The comb teeth are the heart of the music box. Each tooth is carefully polished by skilled craftsmen and tuned to play 528 Hz, a frequency attracting attention as a healing tone. Furthermore, the case combines highly transparent acrylic and a half mirror. This design allows the case to change its expression due to the reflection of light, emitting a beautiful crystal-like shine. From materials to assembly, all facets of the music box are finished by the hands of premier craftsmen.

Full-chorus live performances of 1,172 songs in a variety of genres ranging from classic to pop music

*Some songs were recorded as excerpts of a portion of musical composition.

Through expert craftsmanship, comb teeth are specially tuned to play at the relaxing tone of 528 Hz

Unlike conventional music boxes, it is possible to adjust the volume and tempo

Sound played by the comb teeth resonate within the box, creating a beautiful tone resembling a live performance

9. Music Box (Primotone - Primotone Crystal Model -)

192C001 **2,200,000 yen** (tax incl.)

Material: [Body] Acrylic resin [Mechanical Parts] Steel, Aluminum, ABS
Size: 306 mm (W) × 145 mm (H) × 217 mm (D) Weight: 5.9 kg
Accessories: AC adaptor, 1 Power cord, 3 SD cards Made in Japan

This product ships 2 months after order receipt.

*Due to the manufacturing method of the half mirror, black spots or uneven reflections may be seen depending on the viewing angle and surrounding environment.

*The case may become cloudy depending on some indoor environments. When placed near a humidifier, tap water components, preservative components, etc., may adhere to the case, causing it to become white and cloudy.

*If you wish to use the music box for commercial use, you must sign a contract with the Japanese Society for Rights of Authors, Composers and Publishers (JASRAC) and pay for performance rights.

Brother Industries, Ltd.: Equipment manufacturing specializing in printers, fax machines, sewing machines, etc. Possesses a top global share in sewing machines for both home and industrial use.

XING Inc.: A group company of Brother Industries. Operates JOYSOUND on-demand karaoke for commercial use.

Beautiful molding—the artistry of LEXUS

A stool designed in the motif of a spindle grill. Using the molded plywood technology which is also applied to LEXUS steering wheels, several thin wooden boards are stacked and bent while applying pressure to achieve high strength. Two styles are available: an artificial SHIMA*¹ (striped) pattern that is also used in the interior of LEXUS vehicles, and Japanese cedar, a tree species unique to Japan. The unique RPW technology*² of Tendo Mokko is used to process the Japanese cedar to the appropriate hardness of furniture. The stool can also be used as a side table.

^{*1} Artificial SHIMA pattern
Thinly sliced Agathis wood is dyed black, bleached, laminated, and then sliced again to create a SHIMA (striped) pattern.

^{*2} RPW technology
This technology achieves high hardness by using a roller to consolidate (press and adhere) soft woods such as cedar.

Japanese Cedar (natural color)

Artificial SHIMA pattern (natural color)

Tendo Mokko

A furniture designer and manufacturer with a head office located in Tendo City, Yamagata Prefecture. Tendo Mokko was the first Japanese manufacturer to introduce molded plywood technology to furniture making. The company's advanced technology is also used in LEXUS steering wheels and interior panels. Numerous furniture masterpieces made by Tendo Mokko have been selected for permanent collections at various museums in the United States and Europe.

A fusion of
craftsmanship,
insight,
and innovation

Purveyor to Daihonzan Eiheiji Temple
(Fukui Prefecture) **Fukui Yougasa**

Nurenza umbrellas use an ultra-high-density polyester material that causes raindrops to roll off the umbrella without being deformed. This effect is inspired by raindrops sliding on lotus leaves. We pay particular care to the tension of the fabric so that you can enjoy the sound of rain falling on the umbrella. In addition, the handle is made of maple and genuine leather for a suppleness that resonates with the human senses. The tips and a ferrule have a wood finish that prevents damage to the car.

Fukui Yougasa
Since its establishment in 1972, this venerable umbrella manufacturer has pursued the creation of original umbrellas while preserving traditional techniques. Fukui Yougasa pays attention to details ranging from the fabric and handle to the sound of the rain. The company believes that true manufacturing consists of responding to customer feedback and making things from the customer's viewpoint. Fukui Yougasa constantly strives to provide omotenashi (the Japanese spirit of hospitality) to its customers.

11. Umbrella "Nurenza" Carbon

64LXC10023 **46,139 yen** (tax incl.)
Affix Order Name 64LXC10024 **50,518 yen** (tax incl.)

Carbon material is used for the frame and the shaft to achieve both lightweight and excellent durability. The umbrella can be opened and closed smoothly, and has a structure that does not catch your finger.

Material: [Fabric] Polyester [Handle] Wood (maple), Cowhide

Hydro-Silver Titanium[®] born from the ideas of doctors to support a comfortable lifestyle.

DRC Medical Medicine
 DRC Medical Medicine Co., Ltd. is a drug discovery company that uses its unique Hydro-Silver Titanium[®] technology for protein decomposition, and specializes in the development of therapeutic drugs for infectious diseases and allergies. Physicians specializing in various fields cooperate in development.
<https://drciyaku.jp/>

Hydro-Silver Titanium[®] (Hyd[AgTiO₂]) is a unique clean technology developed by DRC Medical Medicine Co., Ltd. The technology breaks down proteins into components such as water, carbon dioxide, and nitrogen.

Hydro-Silver Titanium[®] comes in two concentrations: +3 +4.
 The proteins which can be broken down depend on the product.

Product	Concentration	Proteins broken down by Hydro-Silver Titanium [®]
Mask (Gauze)	+3	Proteins and unsanitary proteins in pollen and odors
Mask (Non-woven fabric)	+4	Proteins and unsanitary proteins in pollen, odors, and house dust
Mini Towel Handkerchief Wash Towel Face Towel	+4	Proteins and unsanitary proteins in pollen, odors, house dust, and sweat
Bath Mat	+4	Proteins and unsanitary proteins in odors, sweat, and mold

* Depending on the type and amount of protein, some proteins cannot be broken down. The performance of the towels will vary depending on the usage environment.
 * Please do not use if you are allergic to silver or titanium.
 * Please keep usage time of the mask (gauze) or mask (non-woven fabric) to within about 12 hours per day.
 * Masks do not completely prevent infection (infiltration).
 * The color of the masks may change over time due to the effects of the Hydro-Silver Titanium[®] treatment, but they can continue to be used without problem.

Protects against cold germs, respiratory droplets, pollen, house dust, PM 2.5, odors, etc.

Hydro Silver Titanium[®] processed into mask and towel fabric enables fibers to absorb and break down proteins such as pollen and house dust, as well as unsanitary proteins. In addition, proteins that cause sweat odor are also absorbed and broken down. Therefore, the masks and towels can be continually used comfortably while suppressing odors.

New 14. Mask (Gauze) +3, Mini Towel Handkerchief +4 Set (Hydro-Silver Titanium[®]) II

211C009 **2,250 yen/set** (tax incl.)

This set combines a gauze mask with a mini handkerchief towel. The mask adopts a five-layer design provided with a protective filter and is suited for use against wind, respiratory droplets, pollen, and PM 2.5 particles. The mask has high moisture-absorption and moisture-retention properties, and the ear straps are made of wide, soft rubber for a comfortable fit with no ear pain.

Material: [Mask] Cotton 100% [Filter] Polypropylene
 [Rubber ear straps] Nylon, Polyester, Polyurethane
 [Mini Towel Handkerchief] Cotton 100%
 Size: [Mask] 200 mm (W) × 145 mm (H) [Mini Towel Handkerchief] 250 mm (W) × 250 mm (H)
 Set Contents: mask (gauze) (1), mini towel handkerchief (1)
 [Mask] Made in Vietnam [Mini Towel Handkerchief] Made in Japan (Imabari)

15. Mask (Non-woven fabric) +4, Mini Towel Handkerchief +4 Set (Hydro-Silver Titanium[®])

202C005 **1,500 yen/set** (tax incl.)

The set contains a non-woven fabric mask and a mini towel handkerchief that protect against cold germs, respiratory droplets, pollen, house dust, and PM 2.5. The mask (non-woven fabric) is equipped with a protective filter that cuts pollen, bacteria, yellow sand, viruses, and PM 2.5. Also comes with a nose fitter that fits snugly on your nose and an anti-fog sheet for glasses. The ear straps are made from soft rubber for a comfortable fit without ear pain.

Material: [Mask] Polypropylene, Polyester, Polyethylene [Rubber ear straps] Nylon, Polyurethane
 [Mini Towel Handkerchief] Cotton 100%
 Size: [Mask] 160 mm (W) × 90 mm (H) [Mini Towel Handkerchief] 250 mm (W) × 250 mm (H)
 Set Contents: mask (non-woven fabric) (3), mini towel handkerchief (1)
 [Mask] Made in Japan [Mini Towel Handkerchief] Made in Japan (Imabari)

Size: 30 mm (DIA) × 125 mm (H) Made in Japan

* The virus elimination rate (99.0%) is strictly a value yielded in a test environment, and does not represent values obtained in aromatic use of the product in actual spaces.
* No guarantee of effectiveness against all types of viruses is made.
* The product is effective in inhibiting viruses, but no guarantee regarding prevention of infection is made.

The invigorating fragrance of a forest in Mie Prefecture – an original LEXUS blend

This gentle natural aroma is based on oil extracted from hinoki cypress trees in TOYOTA Mie Miyagawa Forest. Toyota Motor Corporation believes that we can regenerate forests in Japan by leveraging our overseas tree-planting experiences and our expertise cultivated in automobile manufacturing. In 2007 we acquired mountain-forest land in the former Mie Prefecture village of Miyagawa (now the town of Odai) in 2007 and launched forest restoration efforts.

HINOKI

The fresh and soothing hinoki fragrance feels as if you are in an invigorating forest

<Ingredients> Hinoki Cypress, Cypress, Bergamot, Ho Wood, Spearmint, Clove

23. Aroma Oil HINOKI (5 ml)

A set containing aroma spray and a milky-blue pouch. A woven name tag with the LEXUS mark and logo is inside the pouch.

Material: [Pouch] Polyurethane, Polyester
Size: [Pouch] 160 mm (W) × 120 mm (H) × 60 mm (D)
Set Contents: 1 bottle of aroma spray, 1 pouch
Made in Japan (The pouch is made in China)

*For products #22, #25, #28, #32, and #33, please maintain a distance of about 20 cm when spraying the aroma spray on clothing.
*For products #26 to #33, color may vary depending on type.

Transforming natural materials to modern design

Thinned wood from Hinohara Village, Nishitama District is used. Enjoy the beauty of modeling by the unique grain of natural wood and skillful laser processing.

34. Aroma Diffuser (HINOKI)

202C007 **5,500 yen/set** (tax incl.)

Aroma diffuser designed with spindle grille motif. Spreads the subtle fragrance of Japanese cypress.

Material: Japanese natural cypress, Glass, 100% Pure Essential Oil*1

Size: 97 mm (W) × 150 mm (H) × 60 mm (D)

Set Contents: Panel, Stand, Glass tube (with HINOKI aroma oil* 1ml)

Made in Japan

*1 Pure Essential Oil: Oil extracted from natural materials.

*To replenish the aroma oil, please use 23. Aroma Oil HINOKI (5ml) / 181C040, which is introduced on p. 16

34

35

35. Set of round coasters (HINOKI)

202C008 **5,450 yen/set** (tax incl.)

The design motifs include the steering, wheel, meter, push-start switch of the LEXUS LC.

Material: Japanese natural cypress

Size: 90 mm (W) × 6 mm (H) × 90 mm (D)

Set Contents: 5 coasters (one for each design)

Made in Japan

36

36. Set of square coasters (HINOKI)

202C009 **5,450 yen/set** (tax incl.)

Designed in the motif of a spindle grille.

Material: Japanese natural cypress

Size: 90 mm (W) × 6 mm (H) × 90 mm (D)

Set Contents: 5 coasters

(3 for spindle grille motif, 2 for LEXUS mark and logo)

Made in Japan

Kodamado produced by MIRICE Co., Ltd.

A manufacturer that specializes in 3D modeling by utilizing expertise that originated from the manufacturing of 3D printers. Launched the Kodamado brand, which handles wood products, and proposes modern Japanese products perfect for today's lifestyle. Also focuses on environmental consideration and the use of regional materials, and promotes the use of thinned wood.

*Due to the use of natural materials, the colors, patterns, and textures shown here will differ from the delivered products.

*There are individual differences in colors on the sides of products, as well as the LEXUS mark, logo, and others areas that have been laser processed.

*Due to aging or repeated washing and drying, the warpage, cracking or discoloration of the products may occur.

LEXUS × Noritake

An item produced in collaboration with Noritake, the first successful Japanese manufacturer of bone china

Milky white with gloss and warmth

Noritake's high-quality bone china is durable and resistant to breakage, even while being thin.

These original cups are designed in the motif of a spindle grille.

Noritake

A manufacturer of Western-style tableware founded in 1904. In 1914, Noritake manufactured the first dinner set in Japan. The company started overseas exports, with a focus on the United States, and became a brand known throughout the world. In 1932, succeeded in manufacturing the first bone china in Japan. Noritake continues to provide products which fuse new innovation with techniques and traditions cultivated over a period of more than 100 years.

Creativity transmitted through the generations

A challenge spanning 1,300 years

Gifu Prefecture Mino Ware

Mino ware is said to have continued since the Heian Period (794-1185). Mino ware has produced numerous creative vessels, such as Seto-guro, Ki-seto ware, Shino, and Oribe. Furthermore, these ceramics gave birth to a wide variety of techniques and ingenuity which have been refined over a long period of time, continuing to support creative work based on free ideas. LEXUS has collaborated with potteries and young ceramic designers who are embracing the challenge of new manufacturing in Mino.

CERAMIC VALLEY Mino Japan

Fancy floral scenes on a white background

39 Cherry blossoms

Sunflowers

New

39. Pair of Multipurpose Cups (Flower)

211C014 6,050 yen/set (tax incl.)

These lightweight multipurpose cups are made using *fuse-yaki**1, a molding technique for thin ceramic materials. The raised floral scenes – spring cherry blossoms and summer sunflowers – are drawn on the white substrate material using a technique called copper-plate transfer*2.

Material: Porcelain
Size: Approx. 80 mm (DIA) × 115 mm (H)
Set Contents: 2 cups (one of each type)

Made in Japan

Ceramic Designer
Kawamoto Keiji kawamata

Born in Toki City, Gifu Prefecture. He is the fourth generation of Kawamata Seitojo, which was founded by Kawamoto Matabei and has continued from the Taisho Period. One of the few potters who has inherited the technique of producing cups from thin materials, a technique which achieved high acclaim in Japan and overseas during the Meiji Period. He carries on the pottery production of his family business, utilizing the inherited techniques to embrace the challenge of creating modern vessels.

*1 *Fuse-yaki*
A technique used when baking pottery made from thin materials. In order to prevent deformation of shape, the pottery is placed with the brim facing downward on a mountain shaped platform and then baked.

*2 Copper-plate transfer
A technique in which paper on which a pattern is printed is hit with a wet brush to transfer the pattern to the ceramic material.

*The cups cannot be used in microwave ovens or dishwashers.

*Other products made by Kawamoto Keiji are introduced on p. 26.

A single blossom inside the cup

40 Cherry blossom

Chinese bellflower

New

40. Pair of Cups (Flowers in Relief)

211C015 5,050 yen/set (tax incl.)

The design of these cups features flowers – a cherry blossom in one and a Chinese bellflower in the other – formed in relief at the bottom inside the cup. Planing*3 of the sides makes for a shape that is easy to hold.

Material: Porcelain
Size: Approx. 85 mm (DIA) × 80 mm (H)
Set Contents: 2 cups (one of each type)

Made in Japan

*3 Planing: A technique of shaving away some of the substrate material to shape the piece into a polyhedron.

Ceramic Designer
Kato Yoshiyasu Yoshiyasu Kato

Born in Nishio City, Aichi Prefecture. After graduating from Kurashiki University of Science and the Arts, he studied ceramic design at Tajimi City Pottery Design and Technical Center. In addition to making ceramic artworks through the application of cast molding, he is engaged in designing dinnerware.

The soft color gradations of fleeting spring

41 Pale Pink

Pale Blue

41. Pair of Mugs (Pastel)

211C016 4,800 yen/set (tax incl.)

The inspiration for these mugs is an usuzumi-zakura cherry tree in full bloom and faintly misty spring skies. The thick rim at the mouth imparts a sense of warmth. These versatile cups can be used for coffee, soup, and more.

Material: Porcelain
Size: Approx. 133 mm (W) × 80 mm (H) × 105 mm (D)
Set Contents: 2 cups (one of each color)

Made in Japan

* Due to the characteristics of production, variations in color and texture may be apparent.

Ceramic Designer
Yasuda Yukimasa SORA

Born in Toki City, Gifu Prefecture. He is the third generation of Yamamoto Seitojo, which was established in 1959. After studying pottery and ceramic design at Tajimi City Pottery Design and Technical Center, he joined the family business of pottery manufacturing. Under the original Sora-kama brand, he is also devoting effort to developing his own original products that are distinctly different from existing ones.

Products #39 to #41 have the LEXUS mark and logo printed on the bottom.

*Products #39 to #41 are handmade one by one. Therefore, the color, pattern, and texture of delivered products will differ from the photograph.

The beauty of crystal flowers in bloom

These crystal flowers are born from a chemical change which occurs during the firing of a special glaze. The expression of the crystal flowers differs depending on factors such as the ambient temperature, the kiln temperature, and the position of the vessel in a kiln. A distinctive floral design is produced from the skill of craftsmen and delicate sensibility which draws upon the serendipity of those factors. The vivid colors are born from a sublime mix of glaze based on the dedicated inquisitiveness of the artist.

42. Set of Saucers (Crystal Flowers)

62LXC10003 **10,083 yen/set** (tax incl.)

Material: Ceramics Size: Approx. 122 mm (DIA) × 23 mm (H)
Set Contents: 5 saucers (one of each color) Made in Japan

42 Ruri

43. Set of Tea Cups (Crystal Flowers)

Made in Japan

*Other products by Sabashi Teruhiko are introduced on p. 26.

Products #44 and #45 have the LEXUS mark and logo printed on the bottom.

*Products #44 and #45 are handmade one by one. Therefore, the color, pattern, and texture of delivered products will differ from the photograph.

Ceramic Designer
Sabashi Teruhiko

Born in Toki City, Gifu Prefecture. He is the third generation of Sabashi Seitojo, which was founded in 1967. He specializes in the production of items such as mugs and coffee cups, and has received high praise at the Exhibition of Minoyaki New Products that is held annually for local manufacturers. He is working on flexible and bold designs that are unfettered by conventional ideas.

LEXUS NEW TAKUMI PROJECT

LEXUS supports new encounters, inspiration, and creation by young Japanese designers who are taking their talents to the world.

Today, regional activities are expected to invigorate all of Japan. A major driving force behind this invigoration is the many designers who create with new ideas unfettered by convention, while at the same time utilizing regional characteristics such as traditional techniques and climate from throughout Japan. From 2016, LEXUS has held the LEXUS New Takumi Project in order to support Japanese manufacturing, including traditional techniques, and to nurture and support the creativity of creators. We collaborated with three upcoming designers from the project.

Iki: the flair of the Edo Period continues to dazzle the world.

Craftsman in Edo-Komon dyeing
Hirose Yuichi

Born in 1978 in Shinjuku, Tokyo. He is a fourth-generation craftsman of the Hirose Dyeworks, which was founded in 1918. In 2014, selected as an award-winner at the 54th Exhibition of East Japan Traditional "Kôgei" and the 61st Japan Traditional Kôgei Exhibition. In 2015, selected as an award-winner at the 49th Japan Traditional Textile Arts Exhibition. When viewed from a distance, it looks like a plain fabric. However, if you take a closer look, you would find breath-taking delicate patterns. Hirose conveys this style and flair of Edo-Komon to the world.

46. Pocket Handkerchief (Edo-Komon Skull)

Navy 182C005 **9,880 yen** (tax incl.)
Light Gray 182C006
Bordeaux 182C007

The skull pattern was designed based on the concept of the way in which all life flows, and the act of living in this world and Buddhist paradise. Dozens of processes are performed with great care and attention to detail. For example, hand-carved paper patterns hardened with persimmon juice are placed on white silk cloth, after which fine patterns are drawn using glue and a spatula.

Material: Silk 100%
Size: 350 mm (W) × 350 mm (H) Made in Japan

Traditional techniques can still draw new charms from paulownia wood.

Traditional Craftsman
Azuma Fukutaro

Born in 1981 in Wakayama Prefecture. At the Traditional Arts School of Kyoto, he learned *Kyo-Sashimono* (woodworking joinery) from Kyoto's master craftsmen, Naito Kunio and Naito Masakazu. Afterwards, he became a craftsman in his family business of making paulownia chests. He also worked on the interior construction of Nate Hachiman Shrine, an Important Cultural Property of Wakayama Prefecture. He is certified as a traditional craftsman of *Kishu Tansu* chests, and applies his superior techniques to the production of paulownia chests and general goods.

47. Paulownia Tea Canister

182C004 **5,551 yen** (tax incl.)

The lid has a dual structure. The outer lid has a pillbox shape which is the highest technique of a paulownia box. This canister has excellent airtightness and prevents aromas from escaping. It can also be used as a container for coffee beans.

Material: [Body] Paulownia [Sanada Strings] Cotton
Size: Approx. 75 mm (W) × 133 mm (H) × 75 mm (D)
Capacity: Approx. 160 g of tea leaves
(capacity differs depending on the type of tea leaves)
Made in Japan

*Tea leaves are not included with the product.

Glass Artist
Kimura Naoki

KIM GLASS DESIGN

Born in Kitami City, Hokkaido in 1984. Established KIM GLASS DESIGN in 2011. In addition to his creative activities, he also serves as Chairperson of the Otaru Garasu City Executive Committee. Received the Contemporary Arts and Crafts Award at the 2016 Japan Contemporary Arts and Crafts Exhibition. Kimura creates products which have a stately presence, yet blend into daily life as an essential part of the owner's lifestyle.

Bold enough to make a statement; these products still blend into daily life.

Hyacinth

50. Pair Glass "Shizuku"

201C011 **12,400 yen/set** (tax incl.)

A handmade glass in the image of dew dripping from a leaf at dawn. The LEXUS mark and logo are engraved on the bottom.

Material: Soda-lime Glass Size: Approx. 86 mm (DIA) × 90 mm (H)
Set Contents: Two glasses (one of each color) Made in Japan

*Products #48 to #50 cannot be used in microwave ovens or dishwashers. *Products #46 to #50 are handmade one by one. Therefore, the color, pattern, and texture of delivered products will differ from the photograph.
*For product #47 please do not wash the product with water due to its wood finish of paulownia. Also, due to the use of natural materials, the grain of delivered products will differ from the photograph.

MICKEY MOUSE
LEXUS collection

These items are made by young ceramic designers who are involved in Mino ware, a form of pottery that has continued since the Heian Period, and are pursuing innovative new manufacturing. The items are full of free ideas unique to Mino ware.

Towards an age in which "high performance" is the criterion for selecting towels. These towels are made of a new material processed from Hydro Silver Titanium®, born from the ideas of doctors.

Hydro Silver Titanium® processed into towel fabric enables fibers to absorb and break down proteins such as pollen and house dust, as well as unsanitary proteins. In addition, proteins that cause sweat odor are also absorbed and broken down. Therefore, the towels can be continually used comfortably while suppressing odors.

Products #54 to #57 have a Hydro Silver Titanium® concentration of +4. It breaks down proteins and unsanitary proteins in pollen, house dust, sweat, and odors.

*Depending on the type and amount of protein, some proteins cannot be broken down. The performance of the towels differs depending on the usage environment.

*Please do not use the towels if you are allergic to silver or titanium.

Material: Porcelain Size: Approx. 79 mm (DIA) × 115 mm (H)
Set Contents: 2 cups (one of each color) Made in Japan

*1 Fuse-yaki: A technique used when baking pottery made from thin materials. In order to prevent deformation of shape, the pottery is placed with the brim facing downward on a mountain shaped platform and then baked.

*The cups cannot be used in microwave ovens or dishwashers.

*Due to the characteristics of the handmade products, the glaze on the surface and inside of the cups will have different unevenness and individual differences.

*Other products made by Kawamoto Keiji are introduced on p. 20.

Ceramic Designer Sabashi Teruhiko

Inspired by the woodblock printing technique of marbling, skilled artisans draw beautiful marble patterns on the cups. They can be used for various purposes such as soup cups and cafe au lait bowls.

52. Pair of Multipurpose Cups Marble
(MICKEY MOUSE)

192C012 6,200 yen/set (tax incl.)

Material: Porcelain
Size: Approx. 145 mm (W) × 66 mm (H) × 116 mm (D)
Set Contents: 2 cups (one of each color) Made in Japan

*Other products made by Sabashi Teruhiko are introduced on p. 23.

Global Cup Director Matsubara Keishiro

Playful shapes in the motif of an enamel cup. Despite being made of porcelain, these pieces express the warm texture of material by utilizing earth tones.

53. Pair of Mugs Bisque
(MICKEY MOUSE)

191C007 5,755 yen/set (tax incl.)

Material: Porcelain
Size: Approx. 115 mm (W) × 75 mm (H) × 93 mm (D)
Set Contents: 2 cups (one of each color) Made in Japan

*The white or vermillion spots and uneven colors appearing on the surface are due to the soil composition and changes in natural hues during firing.

53 Navy

Red

Products #51 to #53 have the LEXUS mark and logo printed on the bottom.

*Products #51 to #53 are handmade one by one. Therefore, the color, pattern, and texture of delivered products will differ from the photograph.

*Products and information related to Hydro-Silver Titanium® are also introduced on pp. 14-15.

MICKEY MOUSE LEXUS collection

Each product is carefully created by experienced Japanese craftsmen, with attention on high-quality materials and design.

58. Tote Bag (MICKEY MOUSE)

Yuri's Products (#58 to #60, #62 to #66, #69 to #80, #93 to #106, #116, #117, #121, #124, #125, #127, #129, #132, #137, #157, #179, #180, and #186)

Founded in 1971, this bag manufacturer is headquartered in Japan's largest bag production area in the city of Toyooka, Hyogo Prefecture. From its earliest days, Yuri Corporation has established a reputation both inside and outside the industry for making high-quality products utilizing the most advanced equipment. Ever since its founding, the company has been committed to uncompromising manufacturing. Today, Yuri Corporation is a premier manufacturer supporting the Japanese bag industry. In 2012, the company established its own factory in the city of Da Nang, Vietnam, where it implements the Japanese spirit of monozukuri (manufacturing) to engage in overseas production.

For business and casual use

Made using high-quality and lightweight nylon fabric from LIMONTA*2, and Saffiano leather*3 for the handle and bottom part.

72. Backpack (Italian fabric)

On products #69 to #74, the inside has a leather tag with the LEXUS mark and logo.

Refining the traditional Dulles bag into a modern design

The New Dulles Bag was born by fusing innovative 3D design with the technological capabilities of Toyooka City, Hyogo Prefecture, an area with a long history of producing bags. Despite the compact appearance created by the beautifully streamlined silhouette, the bag offers a large amount of storage. The body is made from Cordley®*1, a lightweight and durable material. The wooden handle has an easy-to-grip thickness that fits comfortably in your hand. Moreover, the opening has a key lock for security.

Sustainable fabric with added antibacterial effectiveness

These handbags and pouches are made of fabrics in which Paper Yarn OJO+®*1, an ecological product made from paper, is woven up into cotton threads, then treated with TioTio® PREMIUM*2, which demonstrates antibacterial and antiviral effectiveness. The leather used for parts such as the handles and pulls has undergone antibacterial treatment, and bacteriostatic material MAKSPEC®*3 is used for inner linings.

The beautiful world view of GINTA is woven from advanced technology and expert skill.

Laser machines are skillfully operated to cut and sculpt materials, and each item is carefully finished by hand.

Elegant items are created by fusing advanced technology and expert skill—the result is beauty reminiscent of works of art.

Designer
Ginta Siceva

ginta

Born in Latvia. Studied at London College of Fashion and worked as a model. Today, Siceva is a designer involved in making accessories for famous fashion brands. She established her personal brand GINTA in 2007 as a fashion art brand from London. Siceva carefully creates each product, overseeing all processes from design to manufacturing. The result is elegant items which fuse the traditional skill of hand sewing and the advanced technique of laser engraving.

134. Smart Key Bumper (Aluminum)*

Type-A Orange 60LXC10074 **17,076 yen** (tax incl.)

Pieces of aluminum alloy are machined one by one and the coating is anodized*2 for enhanced resistance to corrosion and wear. You can enjoy assembling the bumper yourself using the included dedicated tools.

Material: [Body] Aluminum alloy (Anodized*2)
 [Screw] Stainless steel [Dedicated wrench] Steel
 Size: 44 mm (W) × 76 mm (H) × 17 mm (D)
 Weight: Approx. 27 g Made in Japan

*2 Anodized
 A surface processing method that anodizes aluminum to form an artificial oxide film, thus improving resistance to corrosion and wear.

134 Orange
 *Image of bumper use.
 135 Silver metallic

135. F SPORT Smart Key Case*

Type-B Silver metallic 61LXC10061 **9,984 yen** (tax incl.)

These use a soft and durable cowhide called kip leather.

Material: Cowhide, Resin, Brass
 Size: 50 mm (W) × 80 mm (H) × 16 mm (D) Made in Japan

136. Smart Key Case (Basic)*

Type-B Orange 60LXC10082 **10,371 yen** (tax incl.)

Made using environmentally-friendly vegetable tanned genuine leather.

Material: Cowhide, Suede-like artificial leather (Inside)
 Size: 50 mm (W) × 80 mm (H) × 16 mm (D) Made in Japan

137. Smart Key Case (Italian leather)*

Type-B Rose Pink 61LXC10087 **7,155 yen** (tax incl.)
 Aqua Blue 61LXC10086

Made using high-grade Italian leather to express translucent color and fine texture.

Material: Cowhide (Water dyeing*3), Suede-like artificial leather (Inside)
 Size: 50 mm (W) × 80 mm (H) × 17 mm (D) Made in Japan

*3 Water dyeing
 A dyeing method in which leather is soaked for a long time in a vat containing dye. Preserves the texture which is inherent to leather. The techniques of craftsmen are needed in order to create expressive shades of color.

137 Rose Pink Aqua Blue

*For products #128 to #131, #133, and #135 to #137, water leakage, perspiration, or friction may result in colors being transferred to clothing or the like. Due to the characteristics of leather, the color and texture of delivered products may differ from the photographs.

To enable operation while the key is inside the smart key case, the back of the case indicates the position of the buttons.

Bring greater luxury to business

These cases are made from nylon fabric of superior durability that is based on the same strong yarn used in automobile airbags. The inner lining has undergone bacteriostatic treatment.

New

148. Briefcase

211C059 **42,400 yen** (tax incl.)

The handle is made of genuine leather for a comfortable grip. The case can also be carried by attaching it to the retractable handle of the trolley case. Includes a shoulder belt and name tag.

Material: Nylon, Synthetic leather, Polyester Cowhide
Size: 425 mm (W) × 305 mm (H) × 110 mm (D)
Weight: Approx. 1.5 kg (excluding the shoulder belt) Made in Japan

New

149. Trolley Case (4-wheeled)

211C060 **68,000 yen** (tax incl.)

This is the perfect for business trips or other short travel lasting two or three days. It features ample storage space, including small-item pockets and pen pockets, as well as a side pocket. Includes a nametag.

Material: [Body] Nylon, Synthetic leather Polyester, Cowhide
[Retractable handle] Aluminum, Resin
[Casters] Polypropylene, Polyurethane
Size: 460 mm (W) × 450 mm (H) × 240 mm (D) (including casters)
Weight: Approx. 3.6 kg Made in Japan

Bacteriostatic finish: This is a finish that inhibits bacterial growth on the cloth material.
*No guarantee of effectiveness against all types of bacteria is made.

150. Business Card Case (Intrecciato texture)

Navy 172C051 **17,009 yen** (tax incl.)

Black 172C052

This business card case is made according to specifications for *tukin-machi* (accordion gusset), a traditional Japanese technique. The name refers to how the shape of the outward-folded gussets resemble the shape of an accordion bellows. This design prevents the edges of business cards from sticking for easy removal and storage. Features an embossing method for the appearance of weaving. The LEXUS mark and logo are embossed inside of the case.

Material: Cowhide
Size: 113 mm (W) × 75 mm (H) × 15 mm (D)
(holds about 40 business cards) Made in Japan

*Water leakage, perspiration, or friction may result in colors being transferred to clothing or the like. Due to the characteristics of leather, the color and texture of delivered products may differ from the photographs.

*1 CLEANSE®

This is innovative original treatment technology from Kurabo Industries for strongly immobilizing onto the surface of fabrics the antibacterial and antiviral agent Etak®, which can be fixed onto a variety of surfaces. It has been confirmed to reduce the numbers of certain viruses on the fibers by 99%. It also inhibits the propagation of certain bacteria. Launderability is excellent, with reduction of 99% or more of the numbers of certain viruses on the fibers after 50 household washing cycles having been confirmed.

*2 μ-func.®

This is thread of pure silver processed with polyester film to eliminate tarnishing due to sulfurization, oxidation, or sulfation. Ions from silver exposed by cross-sectioning are released, producing extremely high sustained antibacterial, deodorizing, and antistatic effectiveness.

Antibacterial treatment: Treatment that inhibits bacterial growth.

*No guarantee of effectiveness against all types of bacteria is made.

Antiviral treatment: This is treatment that reduces the numbers of specific viruses in the fibers.

*No guarantee of effectiveness against all types of viruses is made.

*The antiviral treatment is not for the purpose of disease prevention or medical treatment.

Material: [Body] Polyester 100% [Inner sweat liner] Polyester 100%
Size: One size fits all (57-59 cm) Made in China

*1 VIRUS SHIELD®

This material rapidly breaks down viruses with exposure to even weak light of a wide range from the ultraviolet spectrum to the visible spectrum. It offers excellent antiviral performance, and effectiveness of 99% reduction in six hours has been confirmed in contact testing for certain viruses. Because the infectiousness of viruses that come into contact with VIRUS SHIELD® is reduced, dispersal through subsequent contact and the like is inhibited. VIRUS SHIELD® is a registered trademark of Komatsu Matere Co., Ltd.

Antiviral treatment: This is treatment that reduces the numbers of specific viruses in the fibers.
* No guarantee of effectiveness against all types of viruses is made.
* The antiviral treatment is not for the purpose of disease prevention or medical treatment.

172. LEXUS×Admiral Cap (Roundish)

Navy 201C102 **5,550 yen** (tax incl.)

The cap has a soft brim so that it can be rolled for storage in a bag or pocket. The cap is made from advanced Splash Air®*2, a mesh-like material which is highly breathable and repels water. Also, the sweat liner inside of the cap is made from Cool Vital®*3 material which keeps the wearer cool through evaporation.

Material: [Body] Polyester 100% [Inner sweat liner] Polyester 100%
Size: One size fits all (57-59 cm) Made in China

*2 Splash Air®

Made by applying water repellent treatment to the fibers of mesh-like fabric which is highly breathable. Retains the original texture of the fabric while also achieving excellent durability.

*3 Cool Vital®

Wetting and shaking the material creates an evaporation effect to keep the wearer cool.

185. Golf Ball SRIXON Z-STAR XV

211C082 **1 dozen (3 pieces × 4) 8,555 yen** (tax incl.)

211C083 **Half dozen (2 pieces × 3) 4,280 yen** (tax incl.)

These golf balls merge flight distance and spin performance to a high degree. Use of a newly developed two-layer core achieves greater ball speeds, and spin performance during approach is also improved by a newly developed coating.

Made in Japan

186. 2 Way Round Bag

Red 202C071 **9,500 yen** (tax incl.)
Black 202C072
Blue Ash 202C073

The main body is made from material processed with Teflon™*2 for superior water and oil repellency. The bottom of the bag uses polyvinyl chloride material which makes it easy to remove dirt. Can be used as two types of bags: a handbag and a shoulder bag. The bag has four pockets outside and three inside. The inside has a leather tag with the LEXUS mark and logo. Comes with a mesh pouch for holding balls and a bag hanger for hanging on a table.

Material: Nylon (Teflon™ coating*2), Polyvinyl chloride, Polyester
Magnet, Zinc alloy
Size: [Body] 250 (-340) mm (W) × 205 mm (H) × 140 mm (D)
Weight: Approx. 430 g (excluding the shoulder belt) Made in Vietnam

*Golf balls are not included with the product

*The bag hanger in the picture is for the blue ash bag

*2 Teflon™ coating
Forming a shield of fluorine molecules around the fibers prevents the adhesion of water and dirt. "Teflon™" is a trademark of Chemours. Used by Yuri Corporation under license.
